

NOR816

NORSOUND

Application

Bottom edge of acoustic metal doorsets

Fixing

Rebated, held in place with angle brackets

Performance

Acoustically tested in accordance with
BS EN ISO 10140-2
Delayed action drop

Material

Aluminium (Mill finish), Silicone gasket (Grey)

Standard lengths (mm)

750, 900, 1050, 1200

Minimum / Maximum length (mm)

635 / 1600

Maximum gap coverage (mm)

16

Cutback (mm)

150

Actuation

Single

Order codes

NOR816- + Length eg. **NOR816750** (750mm)

Other lengths available on application

Dimensions

Delayed action drop

To avoid pressurisation when closing the door, selected Stadi's are available with an optional mechanism, which delays the dropping of the seal. A combination of damping cylinder and spring extends the closing time of the seal to around 6 to 8 seconds. This means that air can be dispelled during this time, making the door suitable for airlock situations. When opened, the seal moves up again quickly without needlessly rubbing against the floor.
